

ELECTRONIC DICE 2.0 PRIVACY POLICY

This policy on privacy regulates the use of the application software Electronic dice 2.0 for mobile devices that was created by Francesco Maggio.

No information is available to third parties unless Google.

Information provided to you

The application gets the information you provide during download and accept the permissions needed to run the application. Some permissions are given to the runtime application.

This information is simply used for use according to the features of this application.

All data is managed offline.

- Authorization to vibration (VIBRATE):

Necessary for the operation of the "vibration" module.

All data is managed offline.

This information is used for basic use simply based on the features of this application.

You can easily interrupt the entire collection of information from the application by uninstalling it.

You can use standard uninstallation jobs as they may be available as part of your mobile device or via the mobile application market or network.

You can restrict reading some content through permissions however, this can cause the application to stop.

All data stored outside your device is on the Google server as data being analyzed on the Google Analytics platform.

Please note that some or all of the data provided by the user may be required for the application to work properly.

Keep in mind that although we try to provide reasonable security for the information

Process and maintain, no security system can prevent any potential security breaches.

We use AdMob (Google Mobile Ads SDK) to serve ads. Google may use the advertising ID from

the device on which the ad is serving to generate interests and demographics. Interests, demographics,

and other data may be used to serve better targeted ads to the user.

Changes

This Privacy Policy can be updated from time to time for any reason. We will notify you of any changes to our privacy policy by entering the new privacy policy with an app in-app warning. We recommend that you regularly review the Privacy Policy for any changes, such as continued use being considered to endorse all changes.

Your consensus

By using the application, you consent to our treatment of your information as set

Please proceed to this Privacy Policy and modified by us
